

Starting from the base - connect each of the four poles, tightening by hand.

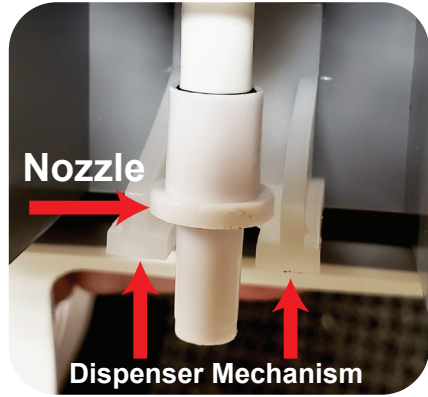

Secure the backing plate to the pole, tightening by hand.

**Note:
Liquid or Gel
Sanitizer
will drip from
the nozzle**

**You can only open the dispenser using the security key - keep it safe!
Gently insert the key into the top of the dispenser to open the unit.
Secure the dispenser through the back of the unit to the backing plate
Fill the sanitizing liquid cartridge and insert into the dispenser unit**

Note: Always check to ensure the rim of the nozzle is above the dispenser mechanism as shown. This is crucial to the proper function of the dispenser.

Secure printing in the sign display by opening the snap frame and then closing the edges of the frame around your printing.

Attach the sign display to the top of the backing plate using the sign pole and screw, tightening by hand.

**Locate the battery compartment and add four 4C batteries
Check to ensure correct +/- alignment.**

Alternately, you can power using the optional power cable inserted into the power input near the battery compartment. Power cable sold separately.

Your Sanitizer Dispenser Stand is now ready to use!
